

This is a detailed site plan for the Guangzhou Metro Line 10 extension project. The plan shows the proposed alignment of the subway line, which is highlighted in red. The alignment starts from the existing station and extends through four distinct land parcels, labeled '地块二' (Parcel 2), '地块三' (Parcel 3), and '地块四' (Parcel 4). The plan includes various engineering details such as station layouts, track alignments, and surrounding infrastructure. Key features include:

- Station Layouts:** Detailed drawings of the existing station and the new station, showing platform, track, and building footprints.
- Alignment:** A red line indicating the proposed subway route, with various segments and connections.
- Land Parcels:** Three specific areas are labeled: '地块二' (Parcel 2), '地块三' (Parcel 3), and '地块四' (Parcel 4), which are the focus of the extension project.
- Infrastructure:** The plan shows existing roads, including '石龙路' (Shilong Road) and '石龙中路' (Shilong Middle Road), and other local infrastructure like '广州地铁十号线' (Guangzhou Metro Line 10).
- Engineering Details:** Various technical annotations, including dimensions, elevations, and stationing, are provided throughout the plan.
